

SURESH V

Technical Support & Cloud Support Engineer

Email: sureshvm1899@gmail.com | Phone: +91 9842319837 | Location: Chennai, Tamil Nadu, India

PROFILE SUMMARY

Technical Support & Cloud Support Engineer with 4+ years of experience in L1/L2 support, cloud operations, and application maintenance for enterprise environments. Proficient in AWS Cloud, ITSM processes, ServiceNow, and Splunk for proactive monitoring, incident management, and root cause analysis. Demonstrated expertise in production support, automation, and process improvement. Recognized for optimizing costs, leading operations, and maintaining consistent system uptime.

CORE COMPETENCIES

AWS Cloud | ITSM | ServiceNow | Splunk | Application Support | Incident & Problem Management | Root Cause Analysis | Client Interaction | Production Support | Team Leadership | Automation | Process Optimization

TECHNICAL SKILLS

Cloud Technologies	Amazon Web Services (AWS): EC2, S3, Lambda, CloudWatch, CloudTrail, VPC, IAM, API Gateway
Monitoring Tools	Splunk, AWS CloudWatch, SolarWinds, Nagios
ITSM Tools	ServiceNow, Jira Service Management, BMC Remedy
Frameworks	Incident Management, Problem Management, Change Management, ITIL Best Practices
Scripting & Systems	Python (Basics), SQL, Docker, Git, Linux Administration
Networking	TCP/IP, DNS, VPN, DHCP, Firewalls, Load Balancers
Soft Skills	Client Communication, Documentation, RCA, SLA Management, Collaboration

PROFESSIONAL EXPERIENCE

Infosys Ltd – June 2021 to Present

Designation: Cloud Operations & Technical Support Engineer | **Client:** KONE

- Delivered L1/L2 support for AWS-based enterprise applications ensuring 99.9% uptime and SLA adherence.
- Managed incidents and service requests via ServiceNow ITSM platform following ITIL guidelines.
- Directed a dynamic team of 6 IoT engineers and support specialists, overseeing daily operations and fostering collaboration.
- Collaborated closely with the development team for daily operations and ad-hoc issue resolution.
- Acted as the primary point of contact for client escalations, troubleshooting complex issues to ensure timely resolution.
- Maintained transparent and open client communication, reinforcing long-term partnerships and trust.
- Defined and implemented comprehensive operational processes for device maintenance, analytics, and fault resolution.
- Implemented proactive maintenance strategies reducing unplanned downtime and improving customer satisfaction.
- Managed operational budgets and optimized resource allocation while achieving project milestones.
- Automated manual processes using Python and AWS CLI, enhancing operational efficiency.
- Governed services of technology partners through agreed SLAs and KPIs ensuring vendor accountability.
- Hosted daily stand-up meetings to review operational backlogs and plan roadmaps for monitoring projects.
- Hands-on experience in validating and troubleshooting across Splunk, IBM Cloud, and AWS environments.
- Prioritized critical bugs and action items derived from Major Incident reviews to prevent reoccurrence.
- Led operational readiness during migration from IBM Cloud to AWS as part of digital platform restructuring

(DPR).

- Initiated data-driven decision-making by implementing analytics dashboards for performance insights.
- Supported multiple production releases with zero downtime and post-release validation activities.
- Proposed cost-saving initiatives achieving 20–30% reduction in EC2 and infrastructure expenses.
- Participated in 20+ Major Incident bridge calls coordinating cross-functional recovery plans.
- Created SOPs, documentation, and internal knowledge bases to improve resolution times.
- Recognized as “Star Performer of the Month” for continuous improvement and proactive problem-solving.

CERTIFICATIONS

- Infosys Certified AWS Solutions Architect
- Infosys Certified AWS Cloud Practitioner
- Infosys Certified Python Associate
- ITIL Foundation (in progress)

EDUCATION

Master of Business Administration (Human Resource) – Alagappa University (2022–2024)

Bachelor of Computer Applications – Sadakathullah Appa College (2017–2020)

HSC – Keins Matriculation Higher Secondary School (2015–2017)

KEY ACHIEVEMENTS

- Reduced infrastructure costs by 20–30% through AWS resource optimization and automation initiatives.
- Enhanced monitoring coverage and reduced incident volume via proactive log analysis and alert tuning.
- Improved service quality through structured problem management and preventive action implementation.
- Strengthened team collaboration and knowledge transfer through process documentation and SOPs.
- Improved trend visibility and operational insights via advanced Splunk dashboards and reports.
- Contributed to long-term reliability and SLA adherence through proactive cloud and application support.
